

DN AGRAR advances strategic execution with new compost facility and Main Market upgrade decision

Press release

Alba-Iulia, December 16th, 2025 - DN AGRAR Group (BVB: [DN](#)), one of the leading integrated agrifood company in Romania and the largest dairy milk producer in Europe, announces the start of the operations at the second automated manure composting facility, located at the Lacto Agrar farm.

The EUR 1.7 million investment doubles the Group's compost production capacity, from 7,000 to approximately 14,000 tonnes per year, through the valorisation of more than 40,000 tonnes of manure annually. The facility is equipped with a sorting line and packaging unit, enabling DN AGRAR to commercialize compost in 5- to 40-liter bags as well as big bags, supporting in time a dual-market strategy with access to both B2B and B2C customers. By 2030, the company is planning a significant expansion, targeting an annual compost production capacity of 40,000 tons.

Peter de Boer, CEO, DN AGRAR Group:

"The completion of our second composting facility marks a concrete expansion of operational capacity and the development of a new value stream complementary to our core dairy business. This milestone represents a further step in the execution of the Group's 2025 - 2030 Development Strategy, which focuses on the expansion of existing business lines, diversification of revenue streams, sustainable growth, digitalization and cost optimization, as well as value creation for shareholders. Against the backdrop of the progress achieved in 2025 across our strategic projects, the increasing scale of our operations and the plans for 2026, DN AGRAR has taken the decision to pursue the upgrade to the Main Market of the Bucharest Stock Exchange in the first half of 2027."

DN AGRAR has also applied for Ecocert organic certification, which is now expected to be completed in the first quarter of 2026, following a longer-than-anticipated process. In parallel, DN AGRAR initiated the organic certification process under EU standards and is developing the sales channel to scale this business line.

Also, the company will obtain carbon credits for both facilities. The company expects to yield 16,000 carbon credits annually, for each facility, for an initial period of five years. This term is eligible for two consecutive renewals, extending the total credits reception period to 15 years. This initiative reinforces DN AGRAR's sustainability roadmap while further diversifying the Group's revenue streams.

About DN AGRAR Group

DN AGRAR Group is the largest dairy milk producer in Europe and one of the leading integrated agrifood company in Romania, listed on the Bucharest Stock Exchange since 2022.

The Group operates an integrated business model focused on milk production, crop cultivation, organic composting and green energy, supporting a sustainable, circular agriculture. With five large-scale farms and a livestock base of 17,000 heads, it delivers approximately 70 million liters of milk per year, with the goal to double the production to 150–200 million liters annually by 2030. DN AGRAR Group manages more than 10,000 hectares of farmland and two compost facilities with a capacity of 14,000 tons of organic fertilizer per year, aiming to increase this to 40,000 tons by 2030. The Group has tripled its business in just three years since going public and now targets a doubling of EBITDA by 2030, alongside the ambition to produce net-zero milk.

To support its growth as a regional leader in premium dairy and food production, DN AGRAR Group's 2030 strategy combines the doubling of milk production capacity with expansion into complementary business segments. These include vertical wheatgrass farms, expected to supply 25% of the current feed input, biomethane production in partnership, industrial greenhouses, and expanded composting infrastructure. Together, these initiatives are designed to enhance operational performance and efficiency, being also enablers for the development of industrial clusters and projects for increasing milk value.

Founded as a family business in 2008 by Jan Gijsbertus de Boer, DN AGRAR Group operates in the heart of Transylvania, with activities spanning in three counties - Alba, Sibiu, and Hunedoara. Listed on the AeRO market of the Bucharest Stock Exchange since February 2022, the company is included in the BETAeRO local index, as well as in the international indices MSCI Frontier IMI and MSCI Romania IMI (Small Cap category).
